

# FORWARD IN FAITH

## Christ & St. Luke's Episcopal Church

Restoration, Rehabilitation, and Renovation  
of the Church Buildings and Grounds

### Phase 1: Water Intrusion Repairs of the Church Buildings (Envelope)

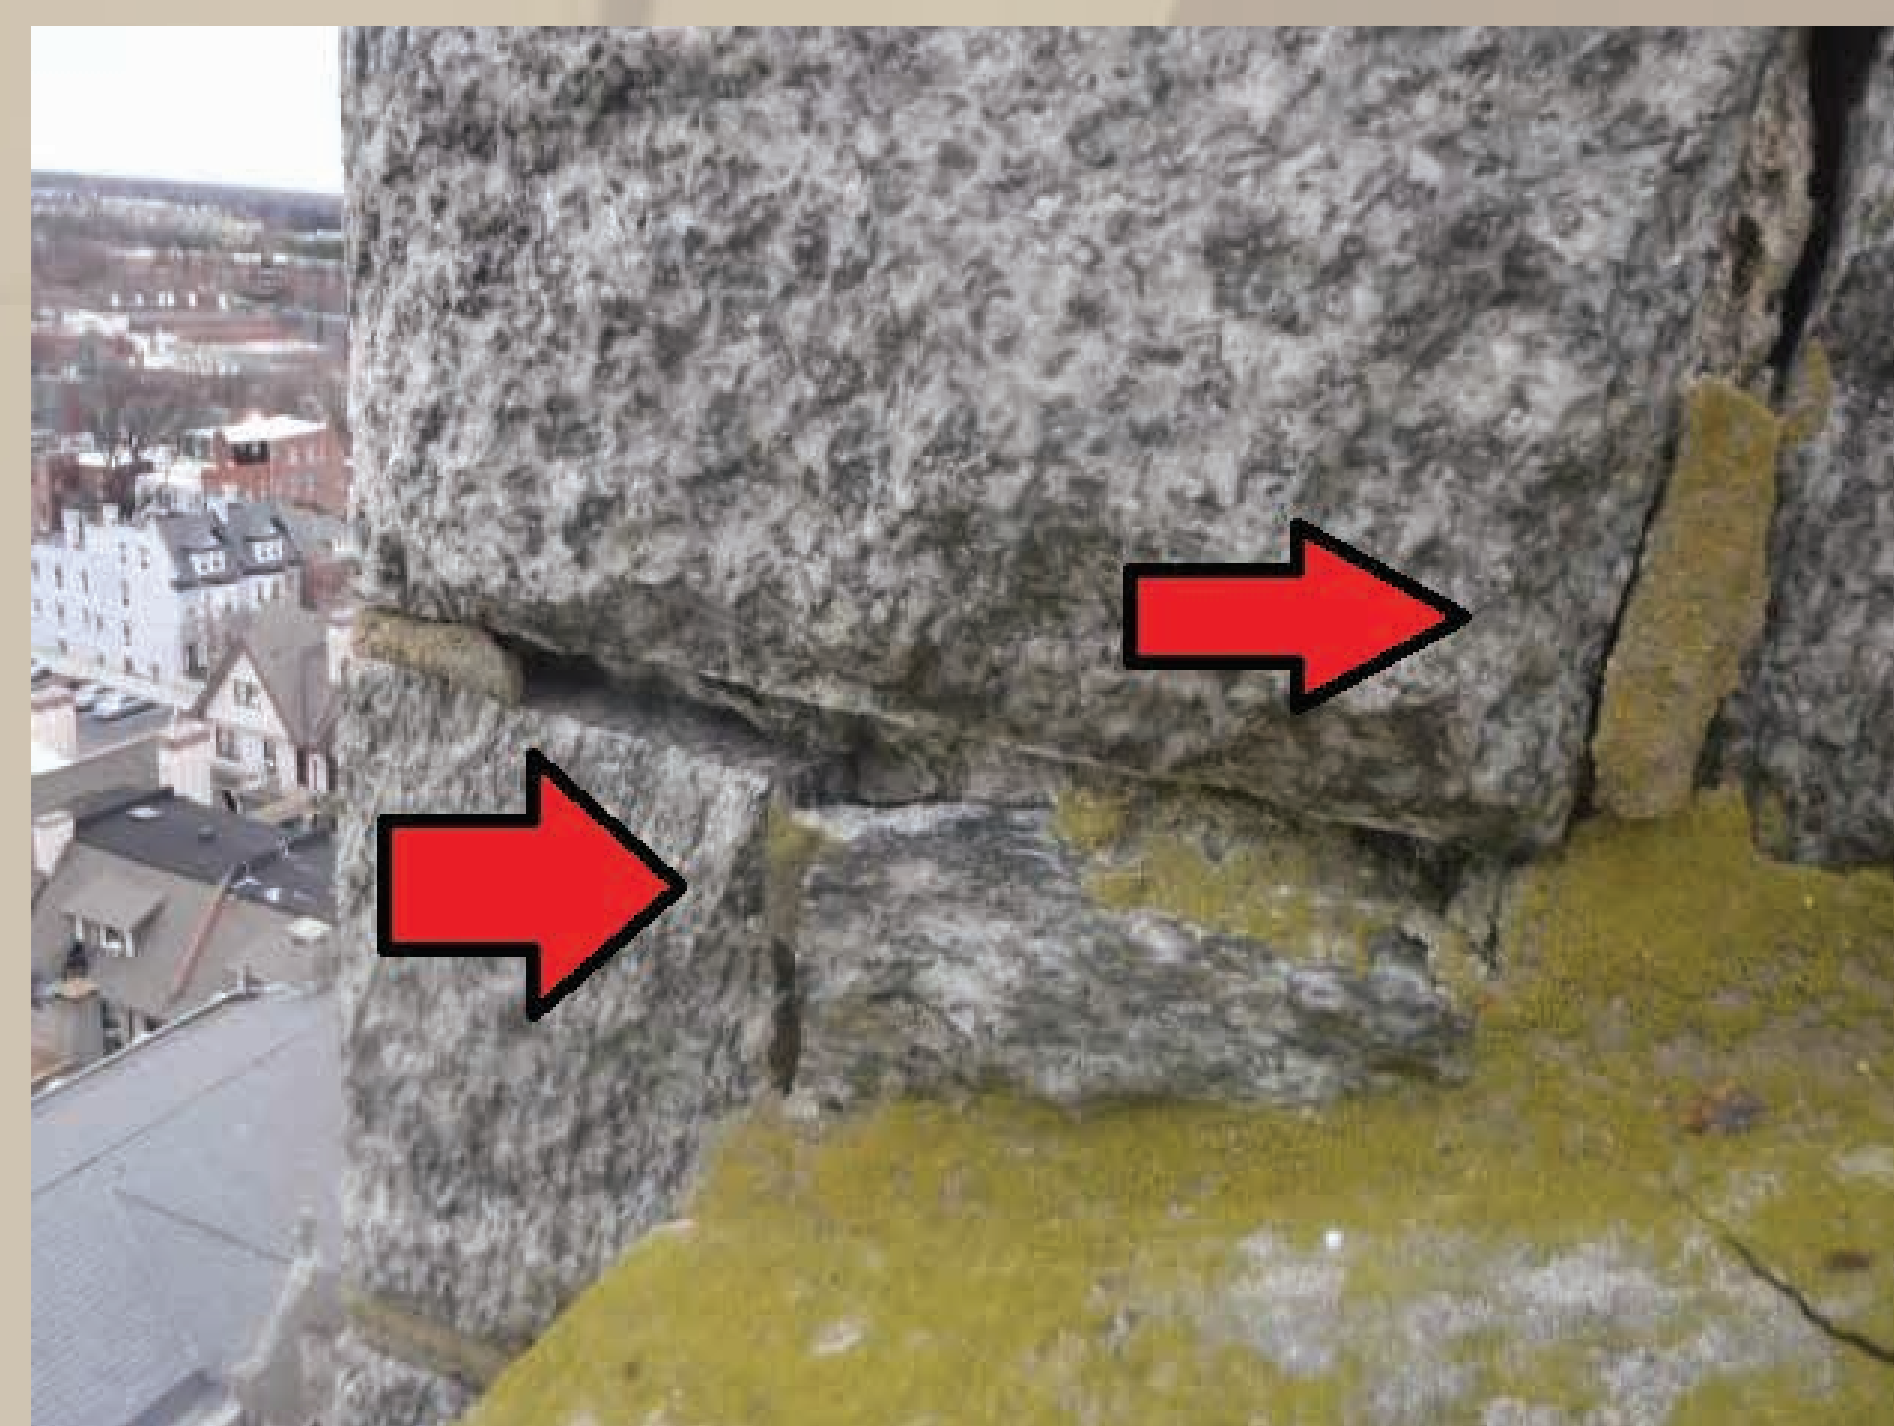

#### What Will Be Done?

This phase involves repairs to the roof, gutters, mortar joints and stonework around the church buildings. The repairs will require scaffolding and other means of access around the church to allow workers to get access to the damaged areas. The work is set to begin in the Fall of 2017 and continue through 2018.

#### Why Is It Needed?

The cracks in the mortar and stonework are allowing water to enter the church and damage the walls, woodwork and windows. Without these repairs, the damage to our building will continue, and the problems will get much worse over time. As the mortar joints deteriorate and the cracks widen, more water will seep into the church building, which will cause additional buckling of the plaster, staining to the stonework, damage to the windows, and further warping and softening of the wooden flooring and pews.

#### How Can You Help?

If you would like to help, you can make a contribution to the building fund at any time. If you have any questions, please contact John Ford at [jbford@odu.edu](mailto:jbford@odu.edu), or any of the other members of the Steering Committee (Ray Gindroz, Kevin Kwan, Win Lewis, Mollie McCune, Bryant McGann, Grant Stokes, Priscilla Trinder-Roady, or Sigur Whitaker).
